HW1 Figures

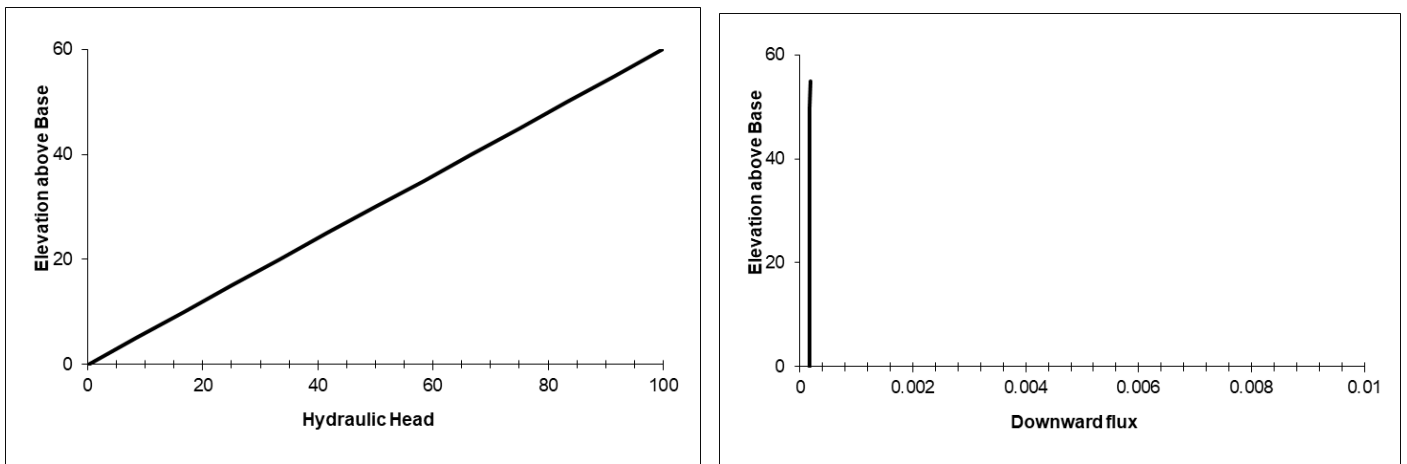

Figure 1. Model figures for a homogeneous column with a constant change in hydraulic head, constant head flux of 0.000167, and a K_{eq} of 0.0001. All K zone cells of 3.

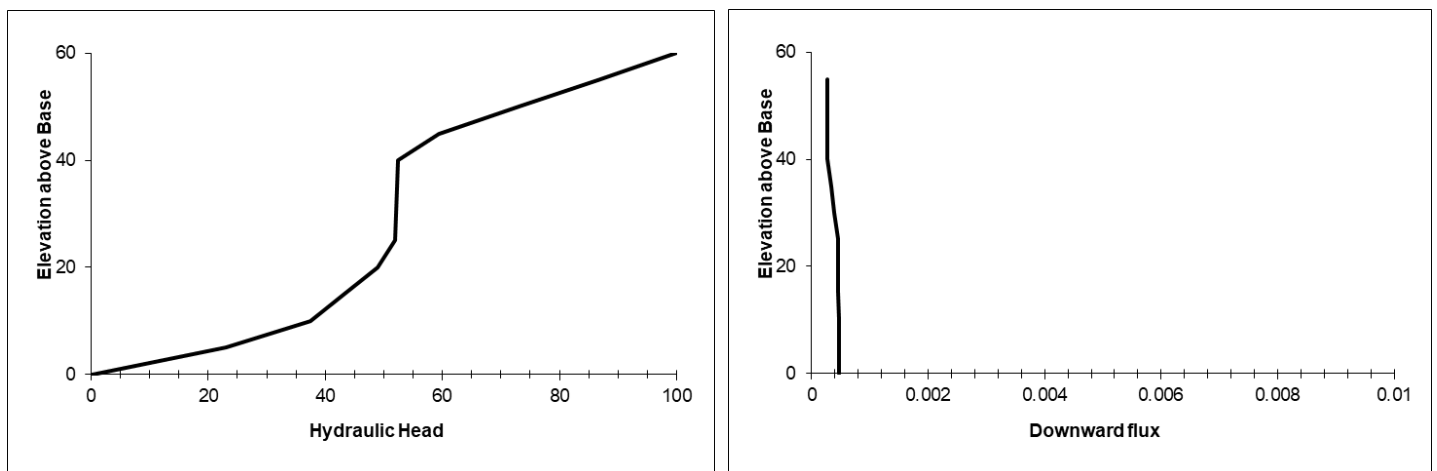

Figure 2. Model figures for a heterogeneous column with k zone cells starting at the base of 3(2), 1(3), 2(4), and 3(4). This column has a varying head flux and K_{eq} of 0.000207.
